

HCW Biologics to Participate in the 2025 Maxim Growth Summit

October 16, 2025

MIRAMAR, Fla., Oct. 16, 2025 (GLOBE NEWSWIRE) -- HCW Biologics Inc. (the "Company") (NASDAQ: HCWB), a U.S.-based clinical-stage biopharmaceutical company focused on discovering and developing innovative immunotherapies to extend healthspan by targeting the link between chronic inflammation and disease, is pleased to announce its participation in the upcoming 2025 Maxim Growth Summit, taking place from October 22nd to 23rd at The Hard Rock Hotel NYC. This prestigious event brings together industry leaders, innovators, and premier institutions to explore the latest trends and advancements across several industries.

Dr. Hing C. Wong, the Company's Founder and Chief Executive Officer, will be meeting with institutional investors in a one-on-one format, and senior Maxim analysts during the event.

Keynote speakers include Larry Kudlow (Broadcaster, Fox News) and Christopher Ruddy (CEO, Newsmax Media). The conference will also feature roundtable discussions with CEOs from small and mid-cap companies, moderated by Maxim Research Analysts. Roundtable discussions will cover a range of sectors, including biotechnology, stem cell therapy, ophthalmology, artificial intelligence, energy and mining, drones, and more.

About HCW Biologics:

HCW Biologics Inc. (NASDAQ: HCWB) is a clinical-stage biopharmaceutical company developing proprietary immunotherapies to treat diseases promoted by chronic inflammation, especially age-related and senescence-associated diseases. The Company's immunotherapeutics represent a new class of drugs that it believes have the potential to fundamentally change the treatment of cancer and many other diseases and conditions that are promoted by chronic inflammation — and in doing so, improve patients' quality of life and potentially extend longevity. Chronic inflammation, including inflammaging, is believed to be a significant contributing factor to senescence-associated diseases and conditions that diminish healthspan, including many types of cancer, autoimmune diseases, and neurodegenerative diseases, as well as many indications that impact quality-of-life that are not life-threatening. The Company's lead product candidate, HCW9302, was developed using the Company's legacy TOBI™ (Tissue factor-Based fusion) platform. The Company has created another drug discovery technology, the TRBC platform, which is not based on Tissue Factor. The TRBC platform has the capability to construct immunotherapeutics that not only activate and target immune responses but are also equipped with receptors that specifically target cancerous or infected cells. This platform is a versatile scaffold that enables the creation of multiple classes of immunotherapeutic compounds: Class I: Multi-Functional Immune Cell Stimulators; Class II: Second-Generation Immune Checkpoint Inhibitors; Class III: Multi-Specific Targeting Fusions and Enhanced Immune Cell Engagers. These novel immunotherapeutics are being developed for treatment of a wide range of disease indications, including oncology, autoimmune diseases, and improving quality of life conditions. The Company has constructed over 50 molecules using the TRBC platform. Further preclinical evaluation studies are currently being conducted for these molecules the Company has selected based on promising preclinical data. The Company has two licensing programs in which it has licensed exclusive rights for some of its proprietary molecules. See the Company Pipeline at <https://hwcwbiologics.com/pipeline/>

About Maxim Group LLC

Maxim Group LLC is a full-service investment banking, securities and wealth management firm headquartered in New York.
